Dear Mr. Wright,

This is to provide a letter of reference for M & W Construction. As I assumed the superintendent position at Carlisle County Schools on July 1, 2008 my first task was to work with the construction project underway. A very comprehensive project was underway gutting and renovating the instructional spaces at both the middle and high schools. The work included building a small addition to the middle school primarily consisting of a music room and geothermal system to the high school.

The contract set target dates for completion ending in August, 2009. M & W committed the manpower and met substantial completion in October, 2008. M & W completed the work necessary for us to begin school as scheduled. Challenges and concerns during the construction process were handled in a professional manner. Work crews on site were mindful that this was a school and presented themselves in a positive manner. We have an updated and beautiful facility for our students learning environment.

I had prior experience with M & W as we embarked on a small project as I was the outgoing superintendent at Providence Independent in 2004. While I was present at the start of the project there no issues and to my knowledge it was completed in a satisfactory manner.

Based on my experiences with M & W, I have no reservations in recommending them to anyone to serve as their general contractor.

Sincerely,

Keith Shoulders, EdD
Superintendent
